Description: We need to completely remodel one bathroom to accommodate a stackable washer and dryer combo and a shower stall. Currently the bathroom has a laundry sink and toilet. The toilet sits on a pedestal and would need removal. The floor may need cutting or an in line pump installed to force the water out the drain. The team would need to purchase all material and supplies. Additionally, there may be some rental required. Church members have lots of tools and there is no need to bring tools unless someone has something unique.
